Year 5 create the Solar System

This term in science, Year 5 have been exploring space. We have been learning the names and the order of the planets in our solar system. The children were amazed at the difference in the sizes of the planets.

In the photos, we created a scale of the distance between the planets to ensure we could fit all the planets in the hall. The children had to work together and listen well in order to ensure the planets were correctly distanced. We also discussed Pluto and its classification as a dwarf planet.
