## Year 1W Science – Summer 1

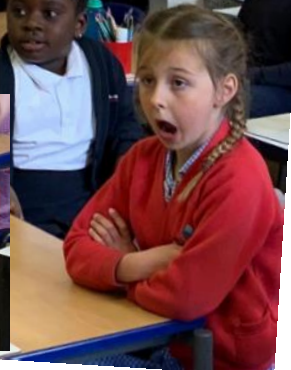

### Zoolab Virtual Visit

As part of our Science topic, Animals, the children in 1W had a zoom session with the scientist at Zoolab and some exciting creatures!

They enjoyed learning about Mike the cockroach and Terry the snake. It was very exciting when Jerry the tree frog climbed the cables and momentarily interrupted their session.

We thought some of the animals were more enjoyable than others. Can you guess which of the visitors we were looking at here? Was it Chips the rat or Rosy the tarantula?
